6.1.1 Concept Definitions:

Responsibility	Concept
Authenticate user data	Authenticator
Graphically displaying user profile	User view
Graphically displaying list of experts	Experts view
Graphically display video call	Video Call view
Graphically displaying list of schedule	Schedules view
Graphically displaying notification	Notifications view
Listen for user input	General UI
Set the user choosing expert	Expert setter
Set the user choosing session	Session setter
Graphically displaying topics	Topics view
Set the user choosing topic	Topicsetter
Set the user choosing chat type	Typesetter
Data Store for the experts in the user's favorite list	User store
Data store for schedules	Schedule Store
Data Store for experts' data	Expert Store
Graphically displaying expert profile	Expert view Profile
Retrieve expert's data	Expert Retrieval

6.1.2 Association Definitions

Concept Pair	Association Description	Association Name
Set the user choosing topic ↔ Graphically displaying topics	Set the user topics according to the available topics	Data retrieval
Set the user choosing expert ↔Graphically displaying experts	Set the user chosen expert according to the available experts	Data retrieval
Authentication user data ↔ User View	Opens the user profile when authenticating his data	Data Logging
General UI↔graphically displaying topics	Upon choosing topic it displays them	Human data interface
General UI↔graphically displaying experts	Upon choosing expert it displays them	Human data interface
VideocallView ↔ typeSetter	Upon choosing the type of the call it redirects to the video call view	Human data interface
Session Setter↔Schedule view	The user chooses from the schedule	Data retrieval
Schedule Store↔Schedule view	The user choose from the schedule store	Data retrieval
Expert Retrieval↔Expert Setter	Experts' setter retrieves the expert data from the expert setter	Data logging

6.1.3 Attributes Definitions

Concept	Attribute	Attribute definition
Authentication user data		
User View	Data logging	Data logging has to with the storage or retrieval of logged data or the logging of data.
ExpertRetrieval		
Expert Setter		
General UI		
graphically displaying experts	Human data interface	Human data interfaces deal with the interaction between the user and the data.
VideocallView		
graphically displaying topics		
typeSetter		
Schedule Store		
User Store	Data Storage	Data storage deals with the storage of the data. metadata store
Expert Store		

6.1.4 Traceability Matrix
